

Configure Wireless for Android 3.0 and higher

The McGill Wireless Network currently supports Android versions 3.0 (Honeycomb) and higher; version 2.x and lower are no longer supported. Follow these steps to set up a wifi connection for Android 3.0 and above. Note that screenshots were taken on Android 4.4.

1. Go to **Settings**.
2. Under **Wireless and Networks**, tap **Wi-Fi**.

3. Select one of the following wifi networks:
 - **wpa.mcgill.ca** (wifi on McGill campus)
 - **wpa.rez.mcgill.ca** ([wireless connectivity in McGill residences](#))
 - **eduroam** (reserved for members of the [eduroam service](#) - non-McGill users visiting McGill and McGill users visiting another institution)
 - **wpa.bus.mcgill.ca** ([wireless connectivity on McGill's Inter-campus Shuttle Bus](#))
 - **CUSM-MUHC.MCGILL.CA** [wireless network of MUHC \(McGill University Health Centre\)](#) found in certain areas) **Note to MUHC staff:** If you do not see this option, and wish to request the installation of a new MUHC wireless access point, please contact MUHC Information Services at **514-934-8484**.

4. When the pop-up appears tap **Connect to network.**
5. Enter the following information where prompted:
 - EAP method:** PEAP
 - Phase-2 authentication:** MSCHAPV2
 - CA certificate:** (unspecified)
 - Identity:** enter your McGill Username (first.last@mcgill.ca, all in lower case)
 - Anonymous identity:** leave it empty
 - Password:** type your McGill Password

6. Tap **Connect**. The connection settings will now be saved to the phone.

Your phone will now automatically connect to this network whenever your Wi-Fi is enabled and the network is in range.
